

IPR512

IP Monitoring Receiver

Up to 1024 supervised Paradox control panels can report system events to the IPR512 receiver over an IP network via a Paradox GPRS / IP reporting module (PCS Series Modules / Internet Modules). All this is achieved through proprietary encrypted communication between the control panel, the Paradox reporting module and the IPR512 receiver. The IPR512 receiver also supervises the automation software and all 1024 connections (control panel presence and IP communication) at a configurable rate.

- 1024 Supervised Paradox IP Reporting Modules
- Redundant Internet Service Provider ISP (WAN1/WAN2)
- 2 Serial Ports (COM1/COM2)
- Integrated Account Management Web Page (LAN)
- Data Backup on External Memory Card
- End-to-End Supervision
- Firmware Upgradeable
- 256-bit AES data encryption
- Supports 19" rack mounting (1U) or desktop installation
- Automatic date and time synchronization via Network Time Protocol (NTP)
