Designed for your lifestyle

Paradox Insight<sup>TM</sup> Solution

Real-time insight into your home or business

The first and only integrated solution of its kind to offer HD video and audio monitoring with superior security capabilities, allowing you to see and hear events and to protect your home or business anytime, anywhere, directly from your smartphone. In case of a security breach, Paradox Insight<sup>TM</sup> provides HD videos with high-quality audio of events for visual verification and reporting.

- HD video and audio camera (720p)
  - Unlimited viewing / recording of live HD video and audio streaming - anytime, anywhere
  - Instant video and audio notification with 10 JPGs for alarm verification
  - Free SDK enables CMS automation software to receive both video and alarm for efficient event reporting
- User privacy protection - set of permissions limit non-master users and CMS system access
  - Secure multiple locations via one app
  - Self-monitoring application allows immediate access to secure locations from anywhere

	Instantly view your secured location/s anytime, anywhere
	Effective response
	Establish a security network
	Privacy controls

	Built to fit different needs
	Dramatically reduce false dispatches
	Easy, intuitive CMS SW/SDK
	Reduce maintenance costs
